Past Projects

Renovation and Digitizing, 15-Bed Hospital Benin

Market Overview

Less than 5% of federal government budget is allocated to Nigeria. Over 60% of healthcare facilities in Nigeria lack basic diagnostic equipment, with only 1.5 beds per 1,000 people compared to the global average of 2.7. Public hospitals are overcrowded and overwhelmed, lacking adequate modern medical infrastructure and technology to meet up with the healthcare demands of 220 million+ Nigerians.

This significant shortfall presents a compelling opportunities for private investment in establishing state-of-the-art hospitals and funding healthcare projects for returns on investment.

Investment Vehicles

Establish Private Hospitals

Vestitude builds and manages state-of-the-art diagnostic, dialysis centres and hospitals for private investors with or without healthcare background.

Fund Healthcare Projects

Investors, can directly fund healthcare projects for a return on investment with Vestitude as Trustees.

Sample ROI Summary

Financial Summary	
Principal invested	₦ 50,000,000

Duration (months)	12
Monthly interest earned	₦ 916,666.67
Total interest earned (1 year)	₦ 11,000,000
Total payout (Principal + Interest)	₦ 61,000,000
Repayment Summary	
Monthly payment (Interest only + Principal upon expiration)	₦ 916,666.67
Monthly payment (Principal + interest only)	₦ 5,083,333.33

Risk Management

Direct Project Implementation – No Fund Transfers to Hospitals

Funds are never disbursed to hospitals to avoid misuse or diversion. Vestitude directly procures, installs, and manages all infrastructure – ensuring full control over capital deployment

Rigorous Hospital Verification & ROI Screening

We thoroughly assess each hospital's financial health, patient volume, and repayment capacity before selection. Only high-performing hospitals with clear potential for investor return are approved

Project-by-Project Investment via SPVs

Each investor funds a specific project through a dedicated Special Purpose Vehicle (SPV). This isolates investor funds from other operational risks and enables transparent performance tracking

Asset-Based Investments with Redeployment or Liquidation Option

Investor funds are used strictly for medical assets (e.g., dialysis machines, diagnostic equipment). In case of hospital default, assets can be swiftly redeployed or liquidated to protect capital and recover returns

Dedicated Backup Funds to Cover Investor Payments

Vestitude maintains internal reserve buffers to ensure investors are paid as agreed, even during hospital default resolution. This protects cash flow continuity while assets are being liquidated or reassigned

Legally Binding Service & Revenue Agreements

Hospitals enter into multi-year agreements with Vestitude and the investors, until repayment is completed. These contracts guarantee consistent monthly income, securing investor repayments

Asset Ownership Remains with Vestitude

All dialysis and diagnostic equipment remains the investor's asset and managed by Vestitude, until repayment is completed by Hospitals.

Impact and Social Good

Enhancement of Quality of Life
Improved healthcare quality leads to improved quality of life

Corporate Social Responsibility (CSR) Impact
Provides investors with the opportunity to support the social cause of transforming the Nigerian health system

Enhanced Quality of Healthcare
